Scrum Wiki Master List & Index Portal

Welcome to the static Scrum documentation portal. This master wiki aggregates and organizes all daily stand-up logs, planning reports, retrospectives, reviews, and velocity charts recorded during the agile development of the **Local Food AI** clinical dietetics engine.

Sprint Ceremonies & Logs

1. [Sprint Plans](#)

Contains Sprint Plan formulations, active user stories selection, scope statements, and team capacity bounds for each milestone loop.

2. [Daily Scrums](#)

Continuous daily stand-up summaries tracking individual task completion, blocker mitigations, and immediate day-to-day coordination.

3. [Sprint Reviews](#)

Contains sprint review logs, clinician demonstration summaries, feature validation checklists, and stakeholder feedback logs.

4. [Sprint Retrospectives](#)

Reviews process improvements, continuous integration learnings, and action items aimed at optimizing team operations and environment tuning.

Deliverables & Quality Assurance

5. [Scrum Artifacts](#)

Indexes sprint velocity metrics, completed story points distributions, burndown coordinates, and final Taiga delivery milestones.

6. [Sprint 8 Test Cases](#)

Legacy acceptance test logs covering core NLP chat, portion converters, and initial search validations.

7. [Uninstallation Guide](#)

Provides structured procedures to completely remove and tear down all system components from Windows and Linux/WSL environments.

8. [Recommendations for Future Projects](#)

Reflections and guidelines derived from this project's challenges to optimize subsequent deployments, including font selection, git attributes management, and shell formatting.

[!NOTE] Operational Compliance: All Scrum files above are synchronized with their respective Taiga milestone identifiers (`Sprint 13` and `Sprint 7`). All physical activities recorded in these markdown logs have corresponding closed tasks inside Taiga.
